

Polar Bears

Do you now about polar bears? Polar bears are cool animals that live out in the wild. But don't get to close or they might tackle you.

Chapter 1: Where they live

Polar bears live far far away from us. Polar bears live in cold places. They might live in the North Pole and Alaska. Polar Bears live in cold places because they have a heavy coat of hair so really they never get cold.

Chapter 2: Cool things

The cool parts about polar bears. There are over 30,000 polar bears in the world. The cool thing is they can smell up to 20 miles and they can smell food from 6 feet thick of ice and snow. Polar bears also have 30 to 40 layers of hair on them.

Chapter 3: What they eat

I think polar bears eat things that people don't like, like the things in here. Gross!! Polar bears eat things in the water like fish. They also eat rodents, shellfish, eggs Whale blubber and seal fish.

Chapter 4: The polar bears

Polar bears are cool but polar bears weigh up to over 2,000 pounds. A mom polar bear weighs to 750 to 1,700.

A dad polar bear weighs to 770 to 1,540. And most of the time the cubs weigh to 30 to 35.

Chapter 5: what polar bears feet are like

Polar bears feet are rough so they can stick to the ice better and swim. Polar bears feet are large paddles that are like rubber.

So you can see what polars bears are like in the wild there pretty cool and I hope you try looking at them. But remember don't go to close or they will tackle you. **BE CAREFUL!!**
