

Soccer

Do you want to learn about soccer? I love soccer because my brother Josh played for special olympics 1 time and he went to state games and he rode a tour bus down to Detroit. Soccer is fun to play but you can get tired out after you play.

Chapter 1

There are lots of rules in soccer. The rules in soccer are no using your hands, fouls which are when you hurt someone in soccer, no fighting, free kicks a free kick is when someone trips you and you get a free kick, penalty kicks is when you shot in front of the goal. **Rules are to keep you safe so the game is fair.**

Chapter 2

There are things that you need to use for soccer. When you play Indoor soccer you need indoor shoes, fake grass, glass, walls. You need indoor shoes so you don't mess up the floor. You need fake grass so you can have lines so you know how far to be from the goal. You need glass so the soccer ball does not go flying outside. You need walls to keep the roof up. **You can not play soccer unless you do not have the stuff to play with for soccer.**

Chapter 3

There are things that you need to wear. What you wear for soccer is cleats, indoor shoes, jerseys, socks, shin guards. You need cleats so you don't slip and fall on the ground. You need indoor shoes for indoor soccer. You need to wear jerseys so people know what number you are. You need socks so your feet are comfortable in your shoes. You need to wear shin guards so your knees do not hit the ground really hard. **You really need to wear the stuff so you do not get hurt.**

Chapter 4

You need supplies to play soccer. The supplies you need is a ball, a bag to put the balls in, goals, and a bunch for the people who are sitting out of the soccer.

Soccer is the most fun sport. Maybe you could sign up for soccer some day.

THE END
